CAREER OBJECTIVE

Enthusiastic Computer Science graduate with a strong foundation in MERN stack, DSA, and backend systems. Skilled in JavaScript, TypeScript, React, Node.js, Express, Prisma, PostgreSQL, and MongoDB. Passionate about building scalable web apps and backend services.

EDUCATION

B.Tech, Computer Science & Engineering
RGUKT IIIT ,RK VALLEY

2021 - 2025

Senior Secondary (XII), BIEAP
Science

2021

Rajiv Gandhi University Of Knowledge And Technologies

Percentage: 90.00%

TRAININGS / CERTIFICATIONS

Full Stack Web Development Course
Dec 2024 - Jun 2025
100xDevs, Virtual

100xDevs is a learning platform and community focused on providing practical, real-world coding skills to help individuals fast-track their careers in tech. It emphasizes hands-on learning and focuses on current industry trends and in-demand technologies. Founded by Harkirat Singh, 100xDevs aims to help students become highly skilled

PROJECTS

[Blog Application ↗](#)
Jun 2025

Developed a full-stack blog application enabling users to create, view, and manage blog posts with seamless frontend-backend integration. The backend was built using the lightweight Hono framework and deployed on Cloudflare Workers for high-performance serverless execution. Created my own npm package module and deployed it in npm and installed in both backend and frontend directories.

[Payment Application ↗](#)
May 2025

Developed a full-stack digital payment application inspired by Paytm, featuring secure user authentication, account management, and real-time money transfer capabilities. Built with a modern tech stack including React, Vite, and Tailwind CSS for the responsive frontend and Node.js with Express and MongoDB for the scalable backend. Implemented JWT-based authentication, and peer-to-peer money transfer functionality with proper validation and error handling.

SKILLS

- JavaScript
 - Node.js
 - TypeScript
 - Python
 - GitHub
- HTML
 - C++ Programming
 - Express.js
 - JWT
 - Next.js
- CSS
 - React
 - Prisma ORM
 - PostgreSQL
 - Docker
